DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01/26/2010 has been entered. Upon entering the submission, claims 20-21, 24, 27-28 and 30-31 are currently pending. Claim 31 remains withdrawn as non-elected subject matter.

Response to RCE Submission

Claim rejection under 35 U.S.C. § 103a

Applicants argued that a proper reading of the Patani teaching of -F replacing -H shows that the specific degree of activity was both variable and unpredictable from compound to compound and from test to test. In addition, the testing data disclosed in the 132 Declaration filed on 05/28/2010 show the inventive compounds of Example exhibit unexpectedly superior efficacy in three different antimicrobial tests over the prior art compounds. Applicants' arguments and the Declaration as a whole have been fully considered, and found persuasive. Therefore, the 103a rejection is hereby withdrawn.

Obviousness-type Double Patenting

For the same reason, the ODP rejections are also withdrawn. See the analysis under 103(a) rejection above.

Claim objection

Examination has been extended to previously non-elected subject matter. All pending claims are under examination. Therefore, the objection for contain non-elected subject matter is moot.

Rejoinder

Claims 20-21, 24, 27-28 and 30 are direct to an allowable product. Pursuant to the procedures set forth in MPEP §821.04(B), claim 31, directed to a method of using an allowable product for controlling unwanted microorganism, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104. Because a claimed invention previously withdrawn from consideration under 37 CFR 1.142 has been rejoined, the restriction requirement as set forth in the Office action mailed on 08/27/2008 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Examiner's amendment

An examiner's amendment to the record with the authorization by Applicants' representative Richard E. L. Henderson dated 02/11/2010 appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 31, line 1, **delete** "unwanted microorganisms" after "A method of controlling" and **insert** -- fungi --.

In claim 31, line 3, **delete** "microorganisms" after "according to Claim 20 to the " and **insert** -- fungi --.

In Title, **delete** "unwanted microorganisms" after "... for controlling" and **insert** -- fungi --.

Reasons for Allowance

The present invention is directed to a compound of the formula (I)

remaining substituents as defined according to claim 20, a pharmaceutical preparation comprising a compound thereof, and a method of use the said compound for controlling fungi.

The closest prior art of record is German Patent Publication No. DE10136065 by Elbe et al. ("the '065 publication").

The '065 publication disclosed a specific compound

This compound has R^{11} as -F, while the instantly claimed compounds have R^{11} as -H. In addition, the testing data disclosed in the 132 Declaration filed on 05/28/2010 show the inventive compounds of Example exhibit unexpectedly superior efficacy in three different antimicrobial tests over the prior art compounds. The instant specification discloses various testing data of using the claimed compounds for treating various fungi, which supports the enablement requirement of the instantly claimed compounds and method for controlling fungi.

Conclusions

Claims 20-21, 24, 27-28 and 30-31 are allowed.
